PROFESSIONAL SUMMARY

Software Developer (MCA) with hands-on experience building production applications across backend, automation, and cross-platform systems using Python and C#. Skilled in RESTful API design, database-driven applications, machine learning, and problem-solving in fast-paced development environments. Adept at writing clean, maintainable code, debugging complex systems, and collaborating with cross-functional teams to deliver reliable software. Seeking a Software Developer role to apply strong programming fundamentals and a track record of shipping functional, well-tested products.

TECHNICAL SKILLS

Languages: Python (Advanced), C#, Java, JavaScript
Python Frameworks: Django, Flask, scikit-learn, pandas, NumPy, PyTest
Web & API: RESTful APIs, Django Templates, Form Handling, Postman, JWT Authentication, Swagger
Databases: MySQL, PostgreSQL, SQL, Database Design & Optimization
Frontend Development: HTML5, CSS3, JavaScript, React.js, Bootstrap, Responsive Web Design
Machine Learning: KNN, SVD, Cosine Similarity, Content-Based & Collaborative Filtering
Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks, SDLC
Tools & Platforms: Git, GitHub, AWS, Docker, Visual Studio, .NET, Unity (C# Scripting)

PROFESSIONAL EXPERIENCE

Experience Zone

Ranchi, India

Software Developer

March 2026 – Present

- Develop and deploy VR applications (APKs) for Meta Quest/Oculus using Unity and C#.
- Currently developing a VR-based training simulation for NCL (Northern Coalfields Limited) to simulate mining traffic operations for safety training.
- Write and debug C# scripts in Unity to implement VR interactions, application logic, and features.
- Build, test, and package Unity projects into APKs for deployment on Meta Quest hardware.

PROJECTS

AERIS – Personal AI Operating System | Python, Google Gemini Live API, PyQt6, SQLite

2026

- Engineered a modular, voice-first Personal AI Operating System integrating LLM-based reasoning with desktop automation, browser control, and proactive task execution.
- Developed a tool-driven agent execution framework with dynamic action discovery, permissions, audit logging, and Observe–Act–Verify–Recover task orchestration.
- Implemented persistent AI memory and local knowledge retrieval using SQLite and full-text search for context-aware, long-term information management.
- Built automation capabilities including workflow scheduling, screen understanding, OCR, and custom wake-word detection.
- Developed and maintained a test suite with 100+ automated tests covering AI, automation, memory, and security components.

Hybrid Book Recommendation System | Python, Flask, Machine Learning

Dec 2024 – May 2025

- Built an end-to-end recommendation engine in Flask combining content-based and collaborative filtering to deliver personalized suggestions.
- Implemented ML models including cosine similarity, KNN, and SVD for matrix factorization.
- Processed 1M+ user ratings using pandas and NumPy, building genre, author, and title embeddings with scikit-learn.
- Achieved a 25% improvement in precision and recall over standalone models through a hybrid approach.

EDUCATION

Galgotias University

Greater Noida, India

Master of Computer Applications (MCA)

Sept 2023 – July 2025

CERTIFICATIONS & TRAINING

Web Full Stack Development Intern – AICTE Eduskills

Feb 2025

Introduction to Big Data – NPTEL, IIT/IISc

Oct 2024

Java Full Stack Developer Intern – AICTE Eduskills

Sept 2024

Android App Development Using Kotlin – EduPyramids, SINE IIT Bombay

June 2024
